## Dwyer Case History

**Project Name:** 

**Bluegrass Station** 

Project Type:	Foundation Repair, Tie Backs, Underpinning, Pressure Grouting, Slabjacking
Location:	Lexington, KY

Project Description: Emergency Wall Repair

General Contractor: Baesler Construction

An exterior wall was severely bowed, the existing footings had settled, and the foundation was rotating and leaning outward. Dwyer installed 29 Helix Tie Backs, 8 Push Piers, Pressure Grouted 8' below the footings to fill voids, and then Slabjacked the interior floor slab 2". Dwyer successfully completed the job on March 4, 2005.
